Experience

Software Engineer Jul 2026 – Present
Cygnet.One *Ahmedabad, Gujarat*

- Built a multi-agent AI advisory assistant integrated into a client benchmarking platform, using Azure AI Foundry, orchestration agents, and natural language interfaces to generate SWOT, TOWS, and strategic recommendation reports from business diagnostic data
- Built a system to classify RCM (Reverse Charge Mechanism) and ITC (Input Tax Credit) eligible invoices by combining deterministic, rule-based logic with AI-driven analysis, using Claude Opus and agentic refinement workflows on AWS Bedrock (boto3) with an accuracy of 90%

Associate AI/ML Engineer Jul 2025 – Jun 2026
Cygnet.One *Ahmedabad, Gujarat*

- Architected and deployed a production-grade conversational AI system leveraging AWS Bedrock, LangChain agents, and semantic search over data lakes to enable natural language querying of product data for enterprise customers.
- Developed an AI agent using micro-LLM to auto-generate test cases with Python, Playwright, and Hugging Face Transformers, improving testing efficiency by 40%
- Performed large-scale tax data analysis in KNIME on 1.5M+ rows and 250+ columns to extract KPIs and deliver executive dashboards using KNIME and Excel

Data Science Intern Jan 2025 – Jun 2025
Cygnet.One *Ahmedabad, Gujarat*

- Automated PDF resume conversion to standardized formats using MERN, Docker, Flask, and OpenAI, reducing HR processing time by 90%; built ETL pipelines and Superset dashboards for region-specific marketing insights

Research Intern Apr 2024 – Jul 2024
Ahmedabad University *Ahmedabad, Gujarat*

- Developed a YOLOv8 model to identify 134 unique mugger crocodiles from 400GB+ UAV imagery (98.5% mAP@50), processing 700K+ images on the Param Shavak supercomputer

Projects

Hard Stop & Momentary Stop Detection | *Python, OpenCV, Machine Learning* Jan 2024 – Apr 2024

- Built a Random Forest model to detect hard and momentary stops on drone video frames, achieving 94% accuracy after systematic preprocessing and feature extraction
- Extended the pipeline to classify moving vehicles and extract trajectory features for downstream analytics

VisDrone Object Tracking | *YOLOv8, ByteTrack, Computer Vision, Deep Learning* Jun 2024 – Jul 2024

- Built a multi-object tracking system on the VisDrone dataset (10,000+ images) with YOLOv8 and ByteTrack
- Improved detection and ID persistence through hyperparameter tuning and data augmentations

Education

Ahmedabad University Ahmedabad, Gujarat, India
Bachelor of Technology in Computer Science *Aug 2021 – May 2025*

Technical Skills

Languages: Python, SQL, JavaScript, HTML/CSS, LaTeX
AI/ML: PyTorch, TensorFlow, scikit-learn, OpenCV, YOLOv8, Hugging Face Transformers, LangChain, CrewAI, LLMs, Vector Databases
Tools & Cloud: FastAPI, Flask, React, Docker, Git, AWS, Oracle Cloud, MongoDB, KNIME, Apache Superset, Linux/CLI

Certifications

AWS: AWS AI Practitioner

Claude: Claude Certified Architect - Foundation

Oracle: Oracle Cloud Infrastructure 2025 Data Science Professional | Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
